

GET THE MOST OUT OF YOUR DATA PLATFORM WITH OUR

ALTERYX TRAINING

Alteryx is an end-to-end analytics platform which enables users to prep, blend and streamline data processes into a repeatable workflow for self service data analytics.

Alteryx enables users to gain deeper insights in hours, not weeks. Our Alteryx training empowers data analysts to perform self-service analytics in a no-code platform.

Our Alteryx training programme consists of two courses dependent on your organisation's needs:

INTRODUCTION

ADVANCED

At the end of the training, users will feel comfortable using Alteryx Designer to connect to data sources, develop workflows and use Alteryx to obtain meaningful insights from data. They will also be well positioned to achieve the Alteryx Core and Advanced certifications.

FIND THE COURSE THAT'S BEST SUITED FOR YOUR TEAM

ALTERYX TRAINING MODULES

Introduction (1 Day)

- Overview to Alteryx
- Connecting to Data Sources
- Interacting with and Prepping Data
- View Data
- Profiling Data
- Joining Data
- Develop Basic Workflows

Advanced (2 Days)

- Advanced Data Preparation
- Spatial Analytics
- Reporting
- Data Investigation
- Macros (Standard, Iterative, Batch)
- Analytic Applications
- Intro to Alteryx Gallery

Each course is charged separately per candidate. The training sessions are offered in two variations depending on your need:

- A six hour in person training session
- Two separate three hour online training sessions

The Advanced course is a continuation of the Introduction course, but we encourage attendance in both courses to reap the full benefits of the platform. The training sessions are highly interactive sessions, where you are encouraged to participate in hands-on exercises, they are not merely demonstrations.
