

GET THE MOST OUT OF YOUR DATA WITH POWER BI TRAINING

Gartner has recognised Power BI as the leading Business Intelligence and Analytics solution. This data visualisation platform provides information insights and collaboration to facilitate fast, data-driven decision making.

Power BI is great at enabling you to transform data into striking visuals and share them with colleagues on almost any device or browser around the world.

We offer two Power BI training courses dependent on your organisation's needs:

INTRODUCTION TO POWER BI

ADVANCED POWER BI

Our Introductory Course starts with a comprehensive overview of Power BI, demonstrates how to create interactive visuals, analyse the data, and an overview of collaboration and sharing.

The Advanced Course follows the Introductory Course with data modelling and manipulation, detailed analysis and insights, data security (RLS), DAX, and ML language.

FIND THE COURSE THAT'S BEST SUITED FOR YOUR TEAM

POWER BI TRAINING MODULES

Introduction to Power BI (1 Day)

- Overview of Power BI
- Accessing Data
- Visualising Data
- Filtering Data
- Analysing Data
- Customising Interface
- Publishing Report
- Access Report from Browser

Advanced Power BI (2 Days)

- Reporting from Multiple Sources
- Data Modelling
- Introduction to DAX
- Published Data and Security
- Advanced Querying
- Advanced Data Modelling
- Understand DAX patterns
- Advanced Analysis with Insights

Each course is charged separately per candidate.
The training sessions are offered in two variations depending on your need:

- A six hour in person training session
- Two separate three hour online training sessions

The Advanced course is a continuation of the Introduction course, but we encourage attendance in both courses to reap the full benefits of the platform. Our training sessions are guaranteed to not merely be demonstrations, these are interactive sessions where we offer hands-on exercises.
