

BECOME A DATA ROCKSTAR WITH

# qlik nprinting training

Qlik Sense provides information insights with the Associative Engine, to enable quick, data-driven decision making.

*"Qlik Sense is a leading Business Intelligence and Analytics solution."*  
- Gartner

An optional component of Qlik Sense, "NPrinting", enables custom reports to be created in MS Word, Excel, PowerPoint, and PDF. Additionally, these reports can be scheduled and distributed via email directly to users' inboxes, and/or shared on an NPrinting distribution server.

To ensure companies get the most value from their Qlik investment, we have developed a specialised training programme to cover these features and functionalities. Ultimately this will ensure your users can have data in a familiar format delivered directly to them, rather than having to go retrieve the values themselves.

## qlik nprinting training modules

### qlik nprinting (1 Day)

- Overview of NPrinting
- Walk-Through the NPrinting Console
- 5 Steps to using NPrinting
- Creating a MS Word Document in NPrinting Designer
- Scheduling and Checking Tasks
- Creating a MS Excel File in NPrinting Designer
- Checking output from Tasks
- Checking Qlik NewsStand

This training is specialised for Developers who will develop reports (not Administration)  
Our modules are offered in two variations depending on your need:

- A six hour in person training session
- Two separate three hour online training sessions

The training sessions are interactive sessions where you are encouraged to participate in hands-on exercises, they are not merely demonstrations.  
\*\*An NPrinting Server will need to be prepared prior to training (may incur an additional cost)
